DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 9-12, 14, 20 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wodrich '466. Wodrich discloses a bracket assembly (as seen in figures 1-4) for supporting planting appurtenances (i.e., seed retaining tongue 70) in substantial alignment with respect to a seed tube of a planter (as best seen in figure 4), the assembly comprising a housing (generally 24) having first and second sides (as seen in figure 4), mounting structure for securing the housing to the planter rearwardly and in alignment with the seed tube (as seen in figure 1) and walls (area of reference numeral 26) for maintaining the first and second sides in spaced relationship; and, wherein the walls further define a passageway 64 and a cavity (area of reference numeral 72), the cavity in alignment with the seed tube for receiving a resilient tool 70. Wodrich further shows the assembly having a support arm type feature 36 which would be capable of supporting additional seed/fertilizer tubes.

Allowable Subject Matter

Claims 3-8, 13, 15-19, 21-23 and 25-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
